GRACE Follow-On Mission: Highlights & Updates

News & Announcements

- The **2024 GRACE-FO Science Team Meeting** is around the corner: October 8-10, 2024, at GFZ in Potsdam, Germany.
IMPORTANT: On-site participants need to register online at <https://www.gstm-2024.eu> **before the deadline on Sunday, 29 September 2024, 23:59 CEST** (on-site registration is not available). Registration for online participation will be possible until the end of the meeting.
- The SDS team has released **new Level-1, 2 and 3 data versions** that improve the gravity and mass change fields in particular for Jan/Feb and 2nd half of 2023 – see details below.

Science & Applications Data Updates

The following **Level-1, 2 & 3 SDS data products** are now available at NASA's Physical Oceanography Distributed Active Archive Center ([PO.DAAC](#)) and GFZ's Information System and Data Center ([ISDC](#)):

Level-1 SDS data products through **Aug 2024**:

- Update frequency: weekly
- Accelerometer data for GF-2:
 - ACX*-L1B Accelerometer transplant data are available through **Jun 2024**; this ACC product bundle is updated on a monthly cadence, with a latency similar to L2 products.
 - For the wide deadband (WDB) months (Jan/Feb-2023 and Jul-2023 onwards; see also Table 1.A in the Appendix and 'Mission Updates & News'), an improved ACC product has available. It includes updated modeling to account for larger attitude deviations and their effect on solar radiation pressure, drag, and winds. These updates yield improved Level-2 products.

- Note: the new bundles are distinguishable by their names: *.ACX.tgz → *.**ACX2**.tgz (product filenames within the tar-bundles remain the same).

Level-2 & 3 data products through Jun 2024:

- Update frequency: monthly.
- The current operational data release for L2 and L3 is **RL06.3** for JPL, GFZ and CSR, and uses the ACX2 data during the wide-pointing months.

The following **Level-3 data** products (global, land, ocean, ice) are available, based on the current L-2 release:

- JPL Tellus global mascon products:
 - https://grace.jpl.nasa.gov/data/get-data/jpl_global_mascons/
- GFZ GravIS land, ocean and ice products:
 - <http://gravis.gfz-potsdam.de/>
- UT-CSR global mascon solutions:
 - http://www2.csr.utexas.edu/grace/RL06_mascons.html

Additional Data Resources:

- At GFZ's GravIS portal, a new version of the prototype of a new satellite-based groundwater product is available, now spanning the period Apr-2002 through Sep-2023 (<http://gravis.gfz-potsdam.de/gws>). This product has been developed within the EU Horizon 2020 Project G3P (Global Gravity-based Groundwater Product, see <https://www.g3p.eu/> for more information).
- A new GFZ information portal on satellite gravimetry monitoring of global mass changes is now online: <https://globalwaterstorage.info>
- All JPL/NASA PO.DAAC data sets, technical notes, and documentation files are available via the PO.DAAC AWS Cloud environment:
 - Please visit <https://podaac.jpl.nasa.gov/cloud-datasets/about> for instructions on how to update your data retrieval / downloads accordingly.
 - All GRACE-FO documentation, Technical Notes (TN-*), and ancillary files are available for download at <https://podaac.jpl.nasa.gov/gravity/gracefo-documentation>

Mission Updates & News

GRACE-FO science data collection and processing updates:

- Since **Jul-2023**, the two spacecraft are collecting science data in a relaxed AOCS pointing mode (a.k.a. 'wide deadband' [WDB], similar to the mode during the **Jan/Feb 2023** test), with pointing offsets up to +/- 2 deg. While the MWI is tracking nominally, the LRI is not collecting inter-satellite ranging data, but is ON in diagnostic mode. This pointing mode reduce thruster activation and overall fuel usage.

- [Solar Cycle #25](#): Solar activity continues at high levels, resulting in orbit altitude decay rates up to 61 m/day in mid-2024 (Fig.1), as well as increased non-gravitational forces on the two GRACE-FO satellites.

Do you have new GRACE-FO results, a conference presentation or paper publication you would like to share? Please send a copy of your GRACE and GRACE-FO related publications to landerer@jpl.nasa.gov and flechtne@gfz-potsdam.de (please also consider a 1-slide highlight summary of the main findings). Corresponding short blog articles may also be published at globalwaterstorage.info.

Mission References

When using GRACE-FO data, please cite the **GRACE-FO Mission reference paper**:

- Landerer, F.W., Flechtner, F., et al., 2020, Extending the global mass change data record: GRACE Follow-On instrument and science data performance, *Geophys. Res. Lett.*, <https://doi.org/10.1029/2020GL088306>.

Science Team Resources:

- The next **2024 GRACE-FO Science Team Meeting** will take place from **Oct 8-10, 2024** in GFZ Potsdam, Germany.
- Proceedings and presentations from previous **GRACE/GRACE-FO Science Team Meetings** are available at [JPL](#) and at [GFZ](#).

GRACE Follow-On: Mission Status

GRACE Follow-On: Orbit

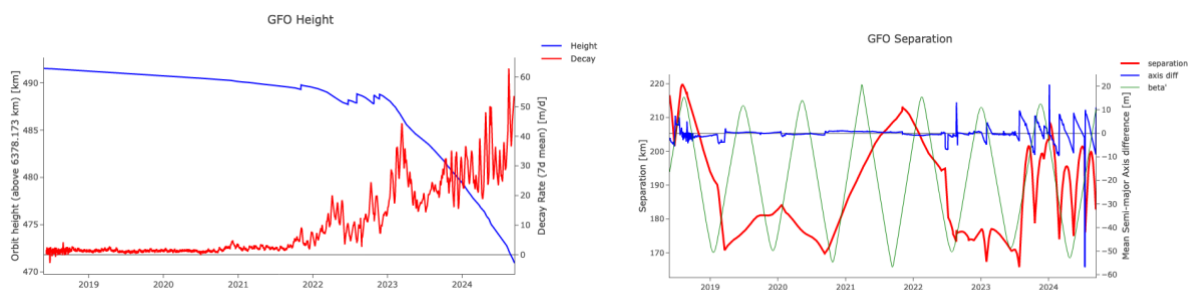

Figure 1: (left) Orbit altitude and daily decay rates [m/day] since launch. (right) Spacecraft separation distance and semi-major axis difference between GF1 and GF2, as well as beta-prime angle of the orbit plane (data and plots provided by K. Snopek, GFZ).

The GRACE Follow-On orbital parameters on 2024-09-13 were as follows:

Mean Altitude (>6378.1 km)	470.9
Altitude difference (GF2-GF1, m)	-2.5
Decay Rate (GF1/GF2) (7d mean, m/d)	52.4 / 51.8
Absolute Distance (km)	183.0
Drift (km/d)	0.60
Sun Beta (deg)	64.4

Science-relevant Mission Events & Plans:

- Both accelerometers (ACCs) are operating and collecting observations in their nominal mode, Normal Range Mode (NRM). GF1 ACC data are used to generate an ACC transplant data product which is provided as the ACT1B product and can be used to substitute the GF2 ACC measurements (please refer to the ACT-Readme document for details at PO.DAAC). In addition to the ‘full’ ACT-transplant, updated calibrated data information from the GF2 accelerometer is incorporated into an improved ACH1B transplant product. This product is recommended for use in generating monthly gravity L2 products (SDS L2-RL06.2 uses L1-ACH / L1-ACX2).
 - NOTE: for Jan/Feb-2023 & Jul-2023 onwards, the ACT1B products for GF2 (only) are *empty*; to generate L2 and higher data products, we recommend the use of the calibrated ACH1B products available in the ACX2-L1B bundles.
- Center-of-Mass (CM) offset determinations are performed approx. every 6 months (see SOE/SCE TN for details).
- Additional calibration periods, spacecraft activities and events are highlighted in the Level-1 release notes and event logs.

Level-1, Level-2, Level-3 Data Products and Processing

Level-1 Data Processing & Delivery

- Level-1 data products (current operational version: L1A/B_v04 weekly; ACX-1B bundle on a monthly basis), which are available at NASA’s Physical Oceanography Distributed Active Archive Center (PO.DAAC) and GFZ’s Information System and Data Center (ISDC), are continuously updated approximately every 7 days. The Level-1 data includes all data required for the generation of Level-2 gravity field products. Please refer to Level-1 release notes, documentation, as well as to the Sequence-of-Events (SOE) logfile for important updates, comments and detailed description of the data, file formats, and conventions ([PO.DAAC](#) / [ISDC](#)).

MWI Performance Statistics

MWI-GPS performance statistics are available in file [TN-01b_KBR_GPS] at ([PO.DAAC](#) / [ISDC](#)).

Level-1 Data Product Availability

- [see Appendix 1A (p. 7) for GRACE-FO Level-1 data]
- [see Appendix 1B (p. 7) for de-aliasing AOD1B model data]

Level-1 Release Notes & Sequence of Events

- [see Appendix 1C (p. 7)]

Level-2 Data Processing & Delivery

Level-2 Data availability

- Level-2 Release 06 data have been processed at JPL, GFZ and CSR and are archived at JPL PO.DAAC and GFZ ISDC. The Level-2 products include the monthly gravity fields from the three mission Science Data System centers (JPL, GFZ, CSR), as well as the corresponding atmosphere and ocean dealiasing (AOD) background model data.
- Please refer to the Level-2 Release Notes and documentation description of the data for file formats, updates, conventions, as well as important processing recommendations ([PO.DAAC](#) / [ISDC](#)).
- [see Appendix 2A (p. 8) for overview tables on data availability].

Level-2 Ancillary Products, Technical Notes and Comments

- TN-14 contains C20 & C30 estimates derived from SLR and using Level-2 RL06 standards, updated in synch with Level-2 monthly releases. It is recommended to replace the native GRACE & GRACE-FO C20 & C30 coefficients with this product (Loomis et al., 2019).

TN-14 Data Access:

- @PO.DAAC: <https://podaac.jpl.nasa.gov/gravity/gracefo-documentation>
 - @GFZ: ftp://isdctftp.gfz-potsdam.de/grace-fo/DOCUMENTS/TECHNICAL_NOTES
- TN-13[a,b,c] contains geocenter estimates using the methods of Swenson et al. (2010) and Sun et al. (2016), and is updated in synch with Level-2 monthly releases. It is recommended to augment the GRACE / GRACE-FO geocenter with this product for surface mass change estimation.

TN-13[a,b,c] Data Access:

- @PO.DAAC: <https://podaac.jpl.nasa.gov/gravity/gracefo-documentation>
- @GFZ: ftp://isdctftp.gfz-potsdam.de/grace-fo/DOCUMENTS/TECHNICAL_NOTES

Level-3 Data Processing & Delivery & Availability

- The following SDS-generated **Level-3 data** products (global, land, ocean, ice) are available:
 - JPL Tellus global mascon & SDS harmonic products:
https://grace.jpl.nasa.gov/data/get-data/jpl_global_mascons/
 - GFZ GravIS land, ocean and ice products:
<http://gravis.gfz-potsdam.de/>
 - UT-CSR global mascon solutions:
http://www2.csr.utexas.edu/grace/RL06_mascons.html
 - GSFC global mascon products:
<https://earth.gsfc.nasa.gov/geo/data/grace-mascons>
- Interactive GRACE & GRACE-FO data browsers (Level-3):
 - NASA/JPL: <https://grace.jpl.nasa.gov/data-analysis-tool>
 - GFZ: <http://gravis.gfz-potsdam.de/>

- <ftp://isdctp.gfz-potsdam.de/grace-fo/>

2.A – Level-2 Product and Data Availability

JPL, GFZ & CSR

- Current Level-2 version: **RL06.3**
- All centers provide GSM solutions
 - Please check the individual Level-2 Release Notes for further details
- Additionally, JPL and GFZ provide corresponding monthly de-aliasing models [GAA, GAB, GAC, GAD]; CSR provides [GAC, GAD].
